

# BLUE SILK

## Filtration system for above-ground pools

Blue Silk: the perfect alternative to replace the cartridge filter for your above-ground pool. Suitable for pools up to 20 m<sup>3</sup>, Blue Silk combines circulation and filtration for clean and healthy water. Easy to install, it effectively traps impurities with its filtering media (not included) and integrated pre-filter. Its 6-way valve simplifies everyday maintenance.

### 🔄 Optimized 60 W power :

Controlled energy consumption for efficient operation, perfect for keeping the water in your above-ground pool up to 20 m<sup>3</sup> perfectly filtered.

🔄 **2-in-1 functions :** This system combines circulation and filtration to ensure clean and healthy water, while simplifying installation and use.

🔄 **6-way valve :** Provides great versatility with modes for filtration, backwashing, rinsing, draining, circulation, and closed. It ensures simplified and thorough pool maintenance.

🔄 **Integrated pre-filter :** Captures larger particles, protecting the pump from blockages and extending its lifespan.

	BLUE SILK
Maximum water flow	3.03 m <sup>3</sup> /h
Power	60 W
Voltage	220-240 V

Compatible filtering media (not included):

**SAND**  
10kg

**GLASS**  
8kg

**PUREFLOW**  
130g

WARRANTY

**2** YEARS

## SIMPLICITY & PERFORMANCE

The Blue Silk is equipped with a 60 W motor, perfectly suited for above-ground pools up to 20 m<sup>3</sup>. **This filtration system combines both circulation and filtration functions to ensure clear and healthy water.**

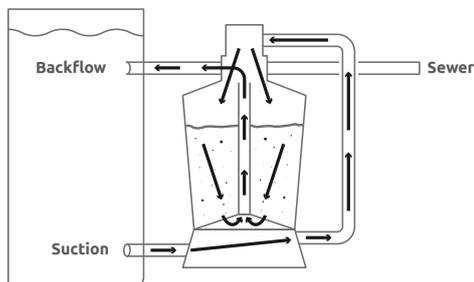

Its filtering media (not included), housed in a compact tank, effectively traps impurities, while **the integrated pre-filter captures larger particles to protect the pump.**

**Featuring a 6-way valve** (filtration, backwashing, rinsing, draining, circulation, closed), it offers great versatility for maintaining your pool. Easy to install, the Blue Silk guarantees simple and reliable use, ideal for everyone.

## OPERATION

Its compact tank is compatible with various filtering media (glass, sand, or Pureflow). The chosen media will determine the filtration precision:

- Sand: 20/30 µ
- Glass: 20/30 µ
- Pureflow: 1 à 3 µ

	BLUE SILK
Voltage	220-240V
Maximum water flow	3.03 m <sup>3</sup> /h
Power	60W
Packaging dimensions	37x37x47 cm
Dimensions	37x34x58 cm
Net / gross weight	5.5 / 6.7 kg
Maximum operating pressure	< 0.2 / 3 bar/psi
Effective filtration area	0.058 / 0.62 m <sup>2</sup> /ft <sup>2</sup>
Maximum water temperature	35°C
Recommended usage	Quartz sand or No.20 glass
Recommended filtering media	Glass / Sand / Pureflow
Homogeneous grain coefficient	> 1.75
Certification	CE

## PUREFLOW COMPATIBILITY

The Blue Silk is fully compatible with the PureFlow filtering media, an innovative and eco-friendly alternative to traditional sand.

**Thanks to its lightweight nature and high filtration capacity, PureFlow enhances the performance of the Blue Silk by capturing even the finest impurities while reducing water consumption during backwashing.**

Easy to install and durable, it ensures crystal-clear water while simplifying the maintenance of your filtration system.
